

The Fraunhofer Institute for Integrated Circuits IIS is one of about 60 applied research-oriented institutes of the Fraunhofer-Gesellschaft with the aim of providing a technological basis for innovative products.

For our department Moving Picture Technologies, location Erlangen Tennenlohe, we are looking for...

Interns and Student Assistants (m/f)

In the area Software-Development for digital Cinema

Already, more than half of the cinema screens worldwide have been digitized. At Fraunhofer IIS, we already developed software solutions for creating and playing Digital Cinema Packages (DCPs). In order to add new and exciting features for future releases we are looking for motivated programmers. You can download a demo version of the software at the Fraunhofer-Alliance Digital-Cinema (www.dcinema.fraunhofer.de) or at www.easydcp.com.

You should have

- Good knowledge of programming languages C/C++
- Knowledge of Qt-Framework advantageous
- Basic knowledge of Model-View-Control (MVC) architecture and other design patterns
- Good programming style

We offer

- Enhancement of existing software components
- Design and implementation of new features
- Design and implementation graphical user interfaces
- Cross-platform testing of new functionality, especially before releases
- Evaluation and Documentation

Moreover, we offer an open and cooperative working environment as well as freedom to develop your own interests, knowledge and skills.

The average working time is 8-12 hours per week (flexible time and day)

Interested?

Do not hesitate: Join our team and work with us on the Technology of tomorrow!
